Abstract

In this obligatory abstract, summarise the main issues addressed by your article and indicate the main results.

1 Introduction

In this obligatory section, introduce the subject matter of your article.

2 An Optional Section

Use as many optional sections as you need to develop your article.

2.1 An Optional Subsection

You do not have to use subsections but you may use as many as you like.

2.1.1 An Optional Sub-Subsection

You do not have to use sub-subsections but you may use as many as you like. However, you should not use any deeper level of nested sections unless an Editor approves their use.

3 Conclusion

In this obligatory section, summarise your main results.

A Optional Appendix

You do not have to use appendices but you may use as many as you like.

Acknowledgements

In this optional section, acknowledge the contribution of individuals and institutions. List all sources of financial support for the article. Declare any potential conflicts of interest.

References

- [1] Provide whatever references your article needs. In the exceptional case that there are no references then the References section should be omitted.
- [2] You may include hyperlinks to cited documents but, if you do, give the date on which you last accessed the hyperlink so that readers may be able to recover the linked item from an archive.
